

WARRANTY OF ELECTRIC PANELS

The warranty applies from the date of the panel's delivery and covers any component that will be proved to be defective and/or presents faults resulting from the production process.

FOR THE WARRANTY VALIDITY it is necessary for the buyer to keep the purchase invoice as well as the warranty. The buyer must verify the good condition of the product upon delivery.

The warranty applies:

1. For panels where the installation was performed by an authorized licensed electrician with the appropriate tools and according to the technical documentation of the manufacturing company without modifications to the panel's wiring
2. For faults which are not due to poor installation, incorrect operation, misuse, poor maintenance, damages due to weather conditions
3. For a period of two (2) years for all the parts of the panel, from the date of delivery
 - The warranty covers only the replacement of a panel's defective part (replacement part)
 - The replacement of a part of the device does not extend the panel's warranty period

The warranty does not cover:

- The cost of the panel's transport, for repair or replacement
- Damages during the transport, which took place after the delivery by us at the transport agency of your choice
- Any part or component of the panel which has been retrofitted
- Any damage resulting from a modification of the panel's wiring
- Consumables (such as fuses, lightning protection devices etc)

All the above shall be borne by the owner of the panel.

By the terms of this warranty, the company V.KAFKAS S.A. assumes no responsibility for the labor costs and the installation of additional materials on the panel.
