

# Routine Test For Unit odysec

IEC 62271-200

Type of unit: -

Year of construction:

Serial number:

Customer:	Number of order:	Number.	of
-----------	------------------	---------	----

## 1. Switchgear electrical characteristics

1)	Rated Voltage [Ur]			(kV)	
2)	Service Voltage [Un]			(kV)	
3)	Rated main busbar current [Ir]			(A)	
4)	Rated short time withstand current [Isc]			(kA)	
5)	Internal Arc Withstand [IAC]:	<input type="checkbox"/> IP30 No IAC <input type="checkbox"/> 16 kA/1s Downstream <input type="checkbox"/> 16 kA/1s Upstream <input type="checkbox"/> 21 kA/1s Upstream	<input type="checkbox"/> 12.5 kA/1s Downstream <input type="checkbox"/> 16 kA/1s Upstream		
6)	Peak current [Ip]:			(kA)	
7)	Insulation (50Hz/1 min) [Ud]:			(kV)	
8)	Impulse withstand voltage (1.2/50 µs) [Up]:			(kV)	

## 2. Tests and Verifications

No	Descriptions	Inspection	Result	Notes
1)	Visual inspection and check of dimensions	<input type="checkbox"/>	-	
2)	Mechanical operation tests	<input type="checkbox"/>	-	
3)	Check and test interlocking	<input type="checkbox"/>	-	
4)	Electrical logic operation and wiring test	<input type="checkbox"/>	-	
5)	Random pull by hand mechanical test for the wiring of the LV compartment	<input type="checkbox"/>	-	
6)	Mechanical 2 <sup>nd</sup> earthing switch contact force test (20 ±5 Nt)	<input type="checkbox"/>	-	
7)	Measurement of ohmic resistance of the earthing switch [mV]	<input type="checkbox"/>	-	
8)	Check of the low voltage circuits according to the drawing ( MCBs, Button, lamps ...)	<input type="checkbox"/>	-	
9)	Check of the shunt opening release of the CB	<input type="checkbox"/>	-	
10)	Check of the motor of the CB	<input type="checkbox"/>	-	
11)	Check of the shunt closing release of the CB	<input type="checkbox"/>	-	
12)	Check of the spring charge	<input type="checkbox"/>	-	
13)	Check of the under voltage coil of the CB	<input type="checkbox"/>	-	
14)	Check of the anti-pumping relay	<input type="checkbox"/>	-	
15)	Check fuse trip function on fuse-disconnector	<input type="checkbox"/>	-	
16)	Dielectric test on the Low Voltage compartment (50Hz@1s, 1kV)	<input type="checkbox"/>	-	
17)	Check of the voltage transformers	<input type="checkbox"/>	-	
18)	Check of the current transformers - Check winding direction	<input type="checkbox"/>	-	
19)	Check of the current transformers - Check CT ratio	<input type="checkbox"/>	-	
20)	Check multimeters, analyzers (measurement devices)	<input type="checkbox"/>	-	
21)	Check and test the protection relay	<input type="checkbox"/>	-	
22)	Check and test the continuity of the earthing circuit	<input type="checkbox"/>	-	
23)	Power frequency voltage insulation test of main circuits (50Hz@1min, 50kV)	<input type="checkbox"/>	-	
24)	Test of the tripping times of the complete equipped CB according order configuration and documents.	<input type="checkbox"/>	-	
25)	Check of the voltage indicator circuits	<input type="checkbox"/>	-	
26)	Voltage indicators' ignition measurement	<input type="checkbox"/>	-	
27)	Verification of the IP Protection	<input type="checkbox"/>	-	
28)	Installation of the labels "Hazard"	<input type="checkbox"/>	-	
29)	Check of the delivery accessories (fuses, keys, manuals drawings etc).	<input type="checkbox"/>	-
